To Whom It May Concern:

I work for the 22nd Judicial District as the Victim Witness Specialist within the District Attorney's Office. In the past we used a spreadsheet to track services provided to victims of crime. The spreadsheet was extremely difficult to follow and created barriers to accurately locate information and gather statistics. We were not able to accurately depict multiple victims with single services or vice versa.

Online Web Services created a custom victim service tracking system that is user friendly, visually appealing and easy to access. We are able to quickly retrieve accurate statistics to provide to our multiple grants for funding. The Victim Service tracking reports fit both our local state and federal funding statistic requirements. The software designers are very responsive whenever we have suggestions or when IT crises may occur. I would strongly recommend this program for your organizations.

'Victim service tracking made easy' is a very accurate statement.

Sincerely,

Brenda Wright
